Beijer Automotive BV / Schijndel / The Netherlands

**BEIJER<sup>®</sup>CAN**

- BEIJER<sup>®</sup>CAN manage your needs for car/truck/motorbike/boat data (CAN)
- BEIJER<sup>®</sup>CAN supply the communication link to your product, application or hardware (GSM/GPRS)
- BEIJER<sup>®</sup>CAN interface between a vehicle's network and your product, application or hardware
- BEIJER<sup>®</sup>CAN integrate the necessary hardware in your product, application or hardware
- BEIJER<sup>®</sup>CAN display what you want your customer to see
- BEIJER<sup>®</sup>CAN offer high power outputs for heavy duty applications
- BEIJER<sup>®</sup>CAN offer multiple outputs, customized for your product, application or hardware

**NOWYOU CAN!**

Based on the quality and reliability of the B2S CAN interfaces which have been successfully applied in countless in-car installation projects over the past decade, Beijer Automotive BV has developed a revolutionary multi purpose platform that serves your needs for car/truck/motorbike/boat data (CAN).

With this platform Beijer Automotive BV can provide you managed CAN solutions, stand-alone or integrated in your application, which enable you to do what you intended to do in the first place: focus and concentrate on the development of your own product and its functionalities!

**WHETHER YOU DEVELOP:**

- ▶ Cruise control systems
- ▶ Fleetmanagement systems
- ▶ Taximeters
- ▶ Floating car data devices
- ▶ FMS/J1939 data devices
- ▶ Accident Data Systems (UDS)
- ▶ Navigation systems
- ▶ Track & Trace systems
- ▶ Handsfree Carkits
- ▶ Adaptive Cruise control systems
- ▶ Lane-departure systems
- ▶ Public Transport systems
- ▶ Traffic management systems
- ▶ or any other system that requires car / truck / motorbike / boat data

**BEIJER<sup>®</sup>CAN MANAGE IT FOR YOU!**
